

Problem Gambling Ireland: Trading & Commercial Activities

Policy regarding beneficiaries who cannot afford to pay:

- **Helping Professionals Training:** To date, we have delivered this training 'in-house'. Generally, the employer organisation funds the training. We have shown a great deal of flexibility regarding costs (including offering free places) and will continue to do so in future. We will make every effort to ensure that any individual or organisation which cannot afford to pay, can avail of the training. The main purpose of this training is to create increased knowledge regarding problem gambling among frontline workers, in order to support problem gamblers and concerned persons.
- **Workplace Gambling Workshops & Talks:** We have not yet delivered this type of service. We would make every effort to provide this service at low-cost or no-cost, to employers who express concerns regarding a gambling-related-harm crisis situation in their organisation and who have an inability (or limited ability) to pay.
- **Responsible Gambling Training for Gambling Industry Staff:** We would make every effort to provide this service at low-cost or no-cost, to employers who express concerns regarding a gambling-related-harm crisis situation in their organisation and who have an inability (or limited ability) to pay.
